

ABSTRACT OF THE DISCLOSURE

The invention is a detergent mixture containing:

- (a) 10% to 30% by weight of protein fatty acid condensate;
- (b) 1% to 12% by weight of a protein hydrolyzate;
- (c) 3% to 20% by weight of an acylated amino acid;
- (d) 1% to 12% by weight of an amino acid; and
- (e) 0% to 3% by weight of a preservative. In addition, the composition can optionally contain
- (f) 0.1% to 10% by weight of a neutralizing agent;
- (g) 0.1% to 15% by weight of sodium chloride, potassium chloride or mixtures of both;
- (h) 0.1% to 15% by weight of a solvent; and
- (i) water.

The mixture is a soft detergent suitable for uses which are in contact with the skin, are high foaming and are not affected by hard water.
